The following is an examiner's statement of reasons for allowance: EP 1 375 182 teaches the equivalence of dibenzyl oxalate, di(4-methylbenzyl) oxalate and di(chlorobenzyl) oxalate as sensitizers in thermally sensitive recording material. As discussed at the bottom of page 9 of their latest response, Examples 1, 9 and 10 in applicants' specification establish that unexpected results are obtained with the halogenated oxalates to which the claims are now limited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

A handwritten signature in black ink, appearing to read "Bruce Hess", with a stylized flourish at the end.
